

A Bean is a Seed – Student Worksheet

In this activity, you will learn about the life cycle of a plant and find out what a seed needs to germinate.

What does a bean need in order to germinate?

Record your observations here:

When did your seed germinate?

What does it look like (draw a picture)?

What do you think it will look like in 2 weeks?

On the back of this page, put the Bean Life Cycle pictures in order. Number the pictures 1-6 and write a sentence about each one.
